

Auto Ticket Classification using Flow Designer

Phase 7 – Project Documentation Phase

ServiceNow – School IT Helpdesk Automation

Phase Overview

The documentation phase records the complete implementation so that the project can be understood, demonstrated, maintained, and reused. The documentation covers requirements, table and field configuration, dependent choices, Flow Designer automation, testing, and Update Set deployment.

Activities / Tasks

- Document the problem statement and objectives.
- Document business requirements.
- Document Update Set creation and configuration.
- Document custom table and field creation.
- Document Category/Subcategory dependency.
- Document Flow Designer trigger, conditions, and actions.
- Document email notification setup.
- Document test scenarios and validation results.
- Document Update Set completion and XML export procedure.
- Maintain screenshots of important configuration and testing steps.

Key Project Details
